

Communicate.

Utilize the Power of Full Color for Dynamic Advertising.

TRUCOLOR™ SERIES

State-of-the-Future Full Color LED Displays.

Powerful resolutions (6, 10, 12, 16, 20, & 25mm) available to fit any application in today's market.

Sharp

With equal spacing of the red, green, and blue LEDs, the highest contrast with a true black background and access to 18 quadrillion colors, pictures and video graphics are fluid and sharp.

Durable

IP65 rated aluminum construction means sealed lightweight cabinets that allow no outside contaminants or water. Light gray cabinets allow for no ventilation and low internal heat. Important factors that preserve the life of the display.

Smart

Modular design, with access from the front, with simple external power and data connections, allows for quick and easy service, if needed, by anyone.

Professional Support

Project management, 24 hr tech support, on-site training, in-house content management team, and our exclusive Total Support (featuring our Virtual Buddy System, VBS) ensures that your display will always be effective with dynamic advertising.
